

Key features

This plugin allows the display **in real time** of external technical data such as: manufacturing data, yields, indicators, statistical measures, etc...

INTEGRATE YOUR DYNAMIC DATA WITH YOUR DISPLAY

On Web pages: Animation of data in the form of tables or graphs available in **object library**.

External sources in txt formats, html, xls, csv, xml, sql, etc ...

ALERTES : Le local 232 est fermé jusqu'au 28/08 pour maintenance

- This plugin can **connect with the Easy Push** pu to perform real time synchronizations.
- The resulting display is mounted in sequence like any other media, allowing interactive control with plugins such as "Media On Demand" or "Pick & Play".
