

Key features

The Easy Show plugin allows **a reliable and secure** screen sharing for multiple users. On touchscreen / keyboard / mouse detection/ action, the dynamic display gives way to a split screen of one to four zones.

SHARED PRESENTATION TOOL

Simultaneous users can view and control their own desktop and Windows applications.

Control of presentations:

- either from the VS-Box screen (touch or keyboard / mouse)
- from shared Windows computers.

The control of the presentations is established via a simplified interface of the virtual remote control type (widget) that you place where you want on your Windows desktop.

This remote control allows the redirection of your screen on the shared screen.
