

Qualification is a very useful moderation function in the case where many contributors intervene on the same display. The moderator allows you to manually broadcast a media or banner on the screen.

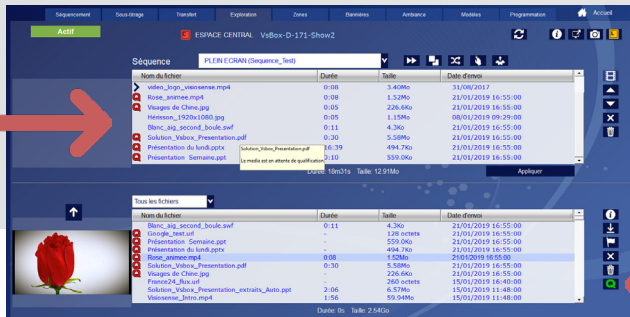

Qualification acts on:

- Manual activation of sequences
- Inlay areas (banners, videos, flash etc ...)
- Automatic programming of sequences or areas of incrustation
- The 2 Diffusion spaces

MEDIA QUALIFICATION

In the exploration tab, a media to be qualified is notified by adding the prefix **Q**

Media waiting for qualification

«Qualification» button that appears for the user (moderator) with the qualification rights

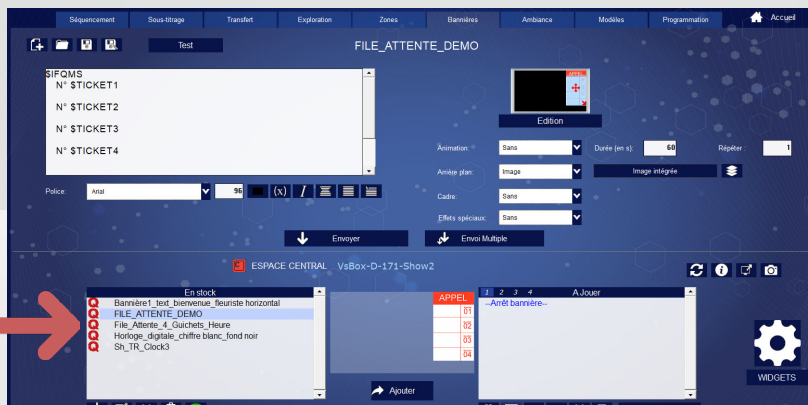

The moderator profile definition is configured in the administration part of the software

BANNIERES QUALIFICATION

In the banner tab a media to qualify is notified by adding the prefix **Q**

Media waiting for qualification

«Qualification» button that appears for the user (moderator) with the qualification rights.
