

USING MODELS

Loading and Customizing a Template from SVS:
Examples: Home, Education, Workshop - Industry, Catering etc ...

Model «INDUSTRY» : Landscape mode

Model «EDUCATION»: Portrait Mode

Model «RECEPTION» : Landscape mode

I WANT TO DOWNLOAD AND MODIFY A TEMPLATE

I open the template tab
I select a «template.visio» in the local explorer.
I send it in the stock. I can then modify it.

I WANT TO CREATE A TEMPLATE

When my scenario is in place, I click on the «CREATE» button.
I name and describe this template.
I download it to my selected Windows folder.
