Visiosense

Key features

Improve the wait with your new home screen.
Orient your visitors with an instant call message.
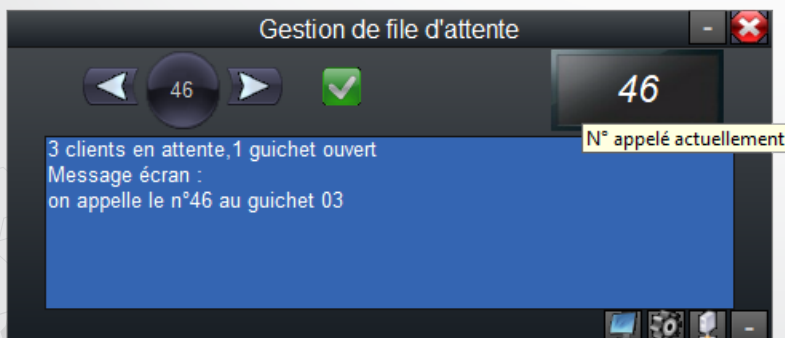

PLUGIN RECEPTION AND WAITING LINE

Waiting line management is centralized on the VsBox server and helps to divide customers or users between different wickets. The call messages are broadcast on the VsBox in the form of personalized banners.

Give the appearance of your choice to your call messages thanks to the editor of standard banners.

Each counter has a mini application allowing him to simply make calls with a few clicks but also to see the result of his call on the screen.

Possibility to print tickets

The call application looks like widgets that you place on your Windows desktop.

- Independent calls from each post
- No limitation in number of wickets
- Reminder of the text inscribed in the banner
- Easy access to the configuration
