

Key features

The Xroom Booking Plugin allows real-time management of room and resource bookings in unlimited numbers. A main screen can display all the reservations, associated to a dynamic visitor guidance. In front of each room a little screen display its own local reservation associated to a welcome banner.

01 PLUGIN BOOKING ROOMS

CENTRALIZED DISPLAY

Display of reservation information in full screen or in an area to receive and inform visitors as part of the dynamic display associated with the Home.

Example of posting with booking plus banner, Twitter and Weather

INTERACTIVE LOCAL DISPLAY

The local display dedicated to the room has an interactivity option to modify a reservation from the screen or the tablet wall touch.

02 BOOKING IN THE VISIOSENSE PLUGIN RANGE

Hosting: Xroom Booking is simply embedded to a standard VsBox using SVS tool Visiosense plugin management.

Administration : In addition to Xroom Booking, the Xroom Manager plugin is used to manage individually the local room screens.
