Visiosense

wSVS

Key features

wSVS is a **lightweight version of SVS**, working under any browsers. It groups together the functions necessary for the exploitation of your scenarios on a daily basis. We find the main sections: media, zones and banners.

01   MEDIA TAB

Drop and select your media from the list. You still have to choose the broadcast area and the time schedule.

List of
your media

Choice of the area

Media to play

Hourly schedule

02   ZONES TAB

Create a new zoning and add it to the list. Choose to validate or not the audio.

List of
your areas

Zone cutting

Activation or stop
zones

Audio

03   BANNERS TAB

Drop and select your banner then edit there. Choose from four banners to play.
